What Privacy Benefits Do Non-VoIP Numbers Offer?

Frequently Asked Questions (FAQs) · https://mobilesms.io/docs/non-voip-privacy-benefits/

MobileSMS.io provides **real SIM-card-based numbers** that deliver significant privacy advantages over VoIP numbers:

1. **Protect Personal Information**: Avoid exposing your personal phone number to apps and platforms, reducing the risk of spam, unwanted calls, and data breaches.
2. **Enhanced Security**: Non-VoIP numbers are harder to trace or exploit, offering an added layer of privacy when signing up for services.
3. **Better Platform Acceptance**: Many platforms block VoIP numbers due to security concerns, while our SIM-card-based numbers are trusted and widely accepted, ensuring seamless account creation without revealing your private number.

Choose MobileSMS.io for privacy-first SMS verifications across **1,200+ platforms**, including email, social media, and financial services.
